PROFESSIONAL SUMMARY

Computer Science senior (Dean's List) graduating May 2026 with hands-on experience building fullstack web applications, RESTful APIs, and relational databases. Proven team leader serving as Scrum Lead on an Agile capstone team and Sibley Scholar which is Lindenwood's premier scholarship for academic excellence and leadership. Seeking a Software Engineering role where I can contribute frontend and backend expertise and a passion for clean, maintainable systems.

TECHNICAL SKILLS

Languages: Java, C#, C++, Python, R, SQL, JavaScript

Web: HTML5, CSS3, Bootstrap, Node.js, ASP.NET Core

Databases: MySQL, SQLite, SQL Server

Tools & Platforms: Git, JIRA, Meraki, Remote Desktop Tools, Windows Forms

Concepts: Data Structures, Algorithms, REST APIs, Multithreading, OOP, Agile/Scrum, 3NF Database Design

EDUCATION

B.S. Computer Science, Lindenwood University, Saint Charles, MO

Aug 2022 – May 2026

Dean's List · Sibley Scholarship Recipient

Sibley Scholarship: Lindenwood's most prestigious undergraduate award, recognizing exemplary academic achievement, leadership, community service, and co-curricular involvement.

RELEVANT PROJECTS

Assessment Report Generator · C#, ASP.NET Core, SQLite, HTML/CSS, Agile Scrum

Senior Capstone Project, Client: Dr. Blythe

- ▶ Built a full-stack web application automating academic assessment reporting, replacing error-prone manual spreadsheet workflows
- ▶ Architected and developed the C# ASP.NET Core backend, implementing RESTful API endpoints for data retrieval, processing, and storage
- ▶ Designed and normalized a relational database (10+ tables, 3NF) in SQLite to manage students, courses, assignments, and learning outcomes
- ▶ Implemented data processing logic to analyze student performance across learning outcomes and generate structured, exportable reports
- ▶ Served as Scrum Lead: facilitated sprint planning, daily standups, sprint reviews, and retrospectives; maintained the team backlog in JIRA
- ▶ Proactively identified and mitigated risks related to data security, performance bottlenecks, and system reliability

Concurrent Airport Simulation · C++, Multithreading, pthreads

- Designed and implemented a multithreaded airport simulation modeling runway access, aircraft scheduling, and resource contention
- Applied mutex locks and semaphores to synchronize shared resources and eliminate race conditions in concurrent execution
- Debugged complex concurrency issues across a stateful, multi-threaded system, improving overall simulation correctness and stability

Data Analysis with R · *R, Regression Modeling, Data Visualization*

- Processed and analyzed large datasets to identify performance trends and statistical patterns
- Built regression models to predict flight delays, quantifying the impact of key contributing variables
- Created clear data visualizations to communicate analytical findings to non-technical audiences

Responsive Web Application · *HTML5, CSS3, Bootstrap*

- Developed a fully responsive web application with structured layouts using CSS Grid and Bootstrap
- Optimized front-end performance and SEO practices, improving page load times and search visibility

WORK EXPERIENCE

IT Help Desk Technician

May 2022 – Aug 2023

Lindenwood University | Saint Charles, MO

- Diagnosed and resolved software, network, and security incidents across campus systems, consistently meeting SLA targets
- Investigated suspicious account activity and supported cybersecurity response efforts, reducing incident escalation rates
- Installed, configured, and maintained user environments across Windows and macOS platforms for faculty and staff
- Leveraged Meraki and remote desktop management tools to troubleshoot issues for distributed campus users
- Recognized for outstanding customer service and reliability by supervisors and end users

Available for full-time opportunities starting May 2026
